CONTROL SYSTEM

Control switch supplied.

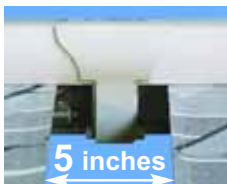

Eagle Motor Kit Left

KIT DOUBLE AWNING

For larger motorhomes you can install two awnings side by side. Crank mechanisms are on the outer ends. With the new cover adapter and the support brackets in aluminium, you can join the two awnings, making them look like one single awning while having the option of extending one or both awnings.

COVER ADAPTER FOR AWNINGS F45i and F45i L

The effects of wind and rain on an awning are unpredictable.

Severe damage to the awning and the vehicle may result. To prevent water build-up on the awning, position one support leg substantially lower than the other to create a slope for adequate water to run off.

If wind or extended periods of heavy rain are expected, close the awning.
